

Equipment Insulation & Connection

Several easy to install products are available for electrical insulation and connection applications that are ideally suited for switchgear, substation and motor control equipment. For example, CBTM bus bar insulation tubing is designed to provide flashover protection against accidental bridging from animal intrusion or during maintenance work on switchgear equipment.

Select the required product by selecting from the application category and choosing the required voltage rating and test standards.

Product	Description	Application	Voltage Reading	Standards
CESK	Elbow Grounding/ Sealing Kits	Environmental sealing of dead-break elbows on jacketed power cables Grounding metal tape shielded power cables	5 kV to 35 kV	
CBTM/ CBTH	Medium Voltage Bus Bar Tubing	Insulation of medium voltage bus bars in switchgear equipment Flashover protection	15 kV to 36 kV	Tested to ANSI C37.20.2
CMVBT	Medium Voltage Bus Bar Tape	Insulation and protection of bus bar joints Flashover protection	15 kV to 25 kV	Tested to ANSI C37.20.2 UL recognized component
CMTK Series	Motor Lead Termination Kits	Motor connections for polymeric cable	600 V, 15 kV
