## TRAFFIC & STREET LIGHTING SOLUTIONS

A TRUSTED PARTNER FOR OVER 50 YEARS

# TRAFFIC & STREET LIGHTING SOLUTIONS

## Why choose Noramco?

As urban environments evolve, so does the need for reliable and efficient street lighting solutions. Noramco leads the way in the electrical industry, leveraging over 50 years of expertise to meet the unique demands of modern urban lighting. We understand the complexities of street lighting requirements and are renowned for our high-level technical knowledge and exceptional sales and service support. Our team is dedicated to providing customized wire, cable, and electrical accessory solutions for projects of any size, ensuring the safety, reliability, and efficiency of urban lighting systems.

## Strategically placed branch locations to meet your project's timeline.

Noramco's nine strategically located distribution centers are stocked with a wide range of products from top industry manufacturers, ensuring we can provide the cabling solutions required for street lighting projects. Our strong vendor relationships also enable us to source rare and specialized items, ensuring your street lighting projects proceed smoothly.

**Noramco offers tailored wire, cable, and accessory solutions for traffic & street lighting.**

## Quality & Compliance

Noramco takes our responsibility to be a good corporate citizen seriously. We have set the bar high for ethical, social and environmental conduct for our employees and expect nothing less from our vendors and their supply chain.

## Value Added Services:

- Material storage and custom tagging.
- Custom shipping and product tracking.
- Pulling Eye installation.
- Paralleling.
- Cut-to-Length and Master reels.
- Striping, Dying, and Twisting.

6 count to 864 Single Mode Fibre  
12 count to 96 with Twisted Pair  
Patch Cords  
Gator Patches  
Fiber Optic Splice Closures

## MTO Approved Fibre Optic Cable

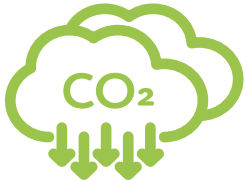

# LEADING WITH ENVIRONMENTAL RESPONSIBILITY

At Noramco, we are committed to sustainability and responsible resource management. Our plastic waste generation is minimal, and all of our locations recycle aluminum, paper, and cardboard. We prioritize reusing materials, such as repurposing cardboard boxes for different products, reducing waste in landfills. Additionally, reels and oil used in our operations undergo thorough recycling processes.

In 2025, we will expand our recycling efforts to include batteries, light bulbs, and copper, ensuring these materials are responsibly disposed of and recycled, supporting resource conservation and environmental protection.

2023	By end of 2025	By 2030	By 2050
EV charging stations in some locations	Salesforce allowance for hybrid or EV vehicles will be bonified	30% reduction of our GHG emissions	 50% reduction of our GHG emissions
Salesforce allowance for hybrid or EV vehicles	EV charging stations everywhere possible	The carbon footprint of the product and life-cycle information available for customers	
Cardboard, paper, plastic, aluminum, oil, and electronic devices recycling program	Launch of copper, light bulbs and battery recycling programs	100% LED lighting in our warehouses	
Cloud-based solutions for most divisions of the company	Route optimization for deliveries (all major suppliers)	Solar panels on all buildings we own	
	100% cloud-based solutions		

## 24/7 Emergency Support

Emergency support is essential when operations run around the clock. Because downtime can be costly and dangerous, Noramco provides a 24/7 Emergency Support line where you can reach out to us for help after regular weekday hours, on weekends, and holidays.

**Toll Free: (800) 663-8434**
